Assingnment-1:

```
Package edu;
public class university{

    private string name;
    private string location;

public university (string name, string location){
    this.name= name;
    this.location = location;
}

public string getname(){
    return name;
}

public string getlocation(){
    return location;
}
```

```java
public void displayInfo (){
    system.out.println("University: " + name);
    system.out.println("location: " + location);
}
}

package mainpackk;
import edu.university;
public class Mainuniversity{

public void main (String[] args){

university uni= new University (
"MBSTU", "Tangail");
uni.displayInfo();
}
}
```
